healthscapes

Healthscapes' INSPIRE is a comprehensive collection of seating solutions for healthcare environments. Designed by Jim Barefoot, INSPIRE is comprised of guest, lounge, tandem, benches and bariatric seating, plus a complete selection of recliners, gliders and sleepers.

A complementary occasional table collection in a choice of wood or laminate tops is also offered. In addition to thirteen standard wood finishes and eight laminates, custom wood matching is available on all INSPIRE products for no additional charge and no minimum order requirement.

recliner - electronic button control

recliner - back push bar

*also available*

IV pole bracket

INSPIRE recliners are available with a variety of options to meet every requirement. Choose a weight activated or motorized mechanism... wood or upholstered arms... stationary legs or heavy duty locking casters... plus a convenient push bar and IV pole bracket.

The real time motorized mechanism is operated by an electronic button control on the outside panel. This control allows the user to effortlessly adjust the recliner to any position.

recliner - open

INSPIRE sleepers are offered in three sizes— single, twin and full— available with wood or upholstered arms. An underseat storage compartment provides space for a pillow and blanket. A wall saver function allows the sleeper to retain its same position close to the wall, whether closed or open. Converting the sleeper from a chair to a bed is as simple as 1-2-3. Just lift the seat up at the hand cutout. Then place one hand on each side of the hand cutout below the seat. Pull the unit while taking a few steps back... and the sleeper will open to its extended 75" length.

*Cure* 

INSPIRE gliders provide a smooth gliding motion that is practically effortless. Two sizes of gliders are offered with an upholstered arm or wood arm. Each features a wood finished platform base to complement the design.

healthscapes 

INSPIRE guest and tandem seating featuring panel arms provides everyone with their own personal space. Upholstered side panels are accented by wood on the top of the arms which follow the panel down to create the front legs. All units feature a clean-out area between the seat and back for easy access.
